

jdisconf 2017

October 28th, 2017

<https://conference2017.jdis.ca>

> Presentation

JDISConf is a **whole day of computer science related talks**, and it's completely **free for students**. The conference is organized by the JDIS community. Throughout the day, there will be 4 or 5 talks related to **programming** and **entrepreneurship**.

In some way, it is the continuation of the APIUS, a similar conference that took place in the past few years. Much like the APIUS, JDISConf is completely free and registration includes a breakfast and a lunch. This year's main theme will be **mobile computing**.

> About JDIS

Jeux et Défis en Informatique de Sherbrooke

(JDIS) is a student group at Université de Sherbrooke that was created during the summer of 2015. The group brings students who are interested in computer science together, regardless of their faculty of study.

JDIS's goal is to **promote sharing, distributing, and developing computer science related skills and abilities**. Also, JDIS aims to be a **one-stop shop for everything related to computer science** at Université de Sherbrooke, and aims to **provide support when organizing activities and opportunities** for its members. JDISConf fits within the above goals, all while contributing to the group's visibility and that of its sponsors.

However, it is worth noting that the JDIS group and the JDIS conference are two distinct entities, each having its own budget.

> What we need

Since the conference is free for participating students, we seek financing for the following activities:

- Help provide transportation for the speakers;
- Provide breakfast;
- Provide lunch;
- Provide promotional merchandise (stickers, posters, t-shirts);
- Provide attendance prizes;
- Provide various equipment for the event.

We're also looking for speakers, whose talks would fit with one of the following themes:

- Virtual/augmented reality (AR/VR);
- Mobile apps;
- Connected & self-driving cars;
- Internet of Things;
- Responsive/Progressive Web Apps;
- Security;
- Other related themes;
- And, you guessed it, entrepreneurship!

> What we offer

To thank you for your participation, we offer various levels of visibility:

- Among participating students, who are mostly computer science and computer engineering students;
- Among future co-ops, who will have a unique opportunity to chat with one of your eventual delegates;
- Among the Sherbrooke computer science community, thanks to our local partners;

More precisely, here are various ways we could offer you visibility:

- Your logo and a link to your website on the event's page
- Your logo on the promotional posters;
- Your logo on the t-shirt given to participating students;
- Your name in the "Thank you" section of the conference;
- An ad space for you during the event (banner or kiosk for your eventual representative);
- A meal offered in your name.

Depending on the amount of money you provide us, we offer different privileges:

- With 1,500\$, you are the event's main sponsor. The event is powered by you and you are the most visible sponsor of all;
- With 500\$, one of the meals is offered by you. We provide you with one ad space and we'll gladly distribute your promo merchandise to the participating students;
- With less than 500\$, your contribution will be used to offer attendance prizes in your name.
